PROFESSIONAL SUMMARY

Business Analyst with 2+ years of experience in Digital Transformation, operational transformation, and AI-enabled automation across complex enterprise platforms. Architected and delivered a Microsoft Dynamics 365-based CRM that unified end-to-end real estate lifecycle, including a custom tax collection module and multi-stage revenue collection journeys, driving a 60% reduction in operational man-days and 40% cut in licensing costs across 650+ users. Proven record in cross-functional programme governance, UAT ownership, SLA accountability, change management, and stakeholder influence at senior levels. Adept at translating unstructured requirements into structured, scalable, audit-ready system solutions.

WORK EXPERIENCE

Deputy Manager – Business Analyst & Product | Xanadu Realty (Real Estate Tech) Jan 2024 – Present

Core member of the Technology team responsible for building the Xanadu Operating System (XOS) — a proprietary enterprise CRM on Microsoft Dynamics 365 — to unify end-to-end operations including collections, and vendor governance.

- Designed and implemented a custom tax collection module within the real estate transaction lifecycle, automated collection triggers, and audit-trail documentation.
- Architected end-to-end collection journey modules for B2C revenue workflows: modelled demand-collection lifecycles, automated payment milestone triggers, configured exception-handling logic, and embedded compliance checkpoints across customer-facing and back-office processes.
- Led structured UAT design and execution across 12+ functional modules including the tax and collections suite, defined test scenarios, coordinated cross-functional test teams, logged and triaged defects in Azure DevOps, and managed release sign-off communication to 650+ business users.
- Owned end-to-end requirements lifecycle (ASIS/TOBE gap analysis, BRDs, functional specs, process maps) for all compliance-adjacent modules; ensured automation initiatives were technically consumable, measurable, and operationally scalable.
- Drove automation of data transformation workflows using Python and SSIS Kingsway soft, reduced manual compliance processing overhead and delivered migration timelines 67% faster than conventional benchmarks, with zero business downtime.
- Deployed 'Chanakya', a Power Platform-based enterprise vendor governance and budget control system: standardised multi-stage approval workflows, embedded SLA governance controls, and reduced approval cycle overspending by 70%.
- Managed sprint governance and product roadmap execution across internal and vendor teams using Azure DevOps Kanban boards; maintained 100% milestone adherence across multi-module compliance-technology delivery.
- Led structured change management and training certification programmes for 650+ users across geographies, driving high adoption rates for newly automated and collection workflows.
- Served as senior escalation point for cross-functional platform issues; liaised between technology, operations, finance, and external vendors to resolve blockers and maintain SLA standards.
- Promoted from Trainee to Assistant Manager (6 months) to Deputy Manager (4 months further) in recognition of delivery quality, programme leadership, and organizational impact.

Data Analytics Intern | Inspiredge IT Solutions Pvt. Ltd.

Dec 2022 – Jan 2023

- Automated operational reporting workflows using Tableau and Power BI, transitioning from manual reporting and improving data accessibility for leadership stakeholders.

Data Analyst Intern | Conduent Business Services LLP

Jun 2022 – Aug 2022

- Built stakeholder performance dashboards; identified and eliminated 14.84% redundant data, improving reliability of downstream analytics.

KEY COMPETENCIES

Business Analysis: Requirements Elicitation, BRD, ASIS/TOBE Gap Analysis, Functional Specifications, User Stories, UAT Design & Execution, SDLC, Process Mapping, Change Management, Stakeholder Management, MS Visio

AI & Automation: Power Automate, Power Apps, AI-enabled Workflow Design, Process Automation at Scale, Data Transformation Pipelines

Enterprise Systems: Microsoft Dynamics 365, Power Platform, SharePoint, Azure DevOps, Leadsquared, Kalyera

Analytics & Reporting: SQL, Python, Power BI, Tableau, MS Excel, Azure Data Studio

Programme Delivery: Agile/Scrum, Azure DevOps Kanban, Sprint Governance, Vendor Management, Cross-functional Programme Leadership

EDUCATION

B.Tech. Computer Science & Engineering | Minor: Bachelor of Management Studies 2020 – 2024
Shiv Nadar Institution of Eminence, Delhi NCR (Multidisciplinary Degree – Technology + Management)

CERTIFICATIONS

- BCG Strategy Consulting Virtual Experience Certificate
- IBM Data Analyst Professional Certificate
- Google Data Analytics Professional Certificate

LEADERSHIP & ACHIEVEMENTS

- President, Student Council, Shiv Nadar University, Delhi NCR
- Holder of multiple national and international records (Limca Book, India Book, Asian Book, World Records India) for a 36-hour non-stop physical endurance feat — demonstrating exceptional discipline and execution under pressure.
- Special Award, Sports Department, Shiv Nadar IoE, 'Night of Champions', two consecutive years
- Recognized by Horlicks Wiz Kid (South Asian Talent Show) — awarded 'Pure Potential' and 'Attitude Awesome' titles
